

GENERAL PRACTICE

Attorneys in our General Practice Section provide professional services both to individuals and to corporations. Individual services include everything from the drafting of wills and trusts to estate planning and administration, all of which relies upon our implementation and knowledge of State and Federal tax laws. For corporate clients, the team covers a variety of transactional matters, such as the incorporation or start-up of a business, the sale and purchase of assets or stock, and employment contracts.

We are well equipped to handle a full range of legal matters for businesses, large and small—from providing advice to litigating collection suits. We handle immigration visa cases on behalf of both employers and employees.

Also, our attorneys appear in Courts of limited jurisdiction to handle matters involving landlord-tenant problems and violation of municipal and motor vehicle codes. This augments the wide variety of counsel already available to our client base, and allows us to fulfill our goal of providing a complete range of quality legal services.
